## Rocky Linux ete

Rocky Linux is a community-driven Linux distribution that is a 1:1 binary compatible replacement for Red Hat Enterprise Linux. It is based on Red Hat Enterprise Linux 7. Rocky Linux is designed to be a drop-in replacement for RHEL, providing the same level of stability, security, and performance. The project was announced in February 2016 and aims to provide a sustainable, long-term solution for users of RHEL who are looking for a free and open alternative.
